

Express 2™

It Clicks with You,
Even More than Before.

ENHANCED PERFORMANCE

Meet Express 2, a task chair that brings new levels of ergonomic comfort, supported movement and versatility to the modern workspace.

We knew we were onto a good thing when we created Express in the first place. After all, what's not to like about comfort, support

and approachable style? Still, we believe in refining our designs so they are the best they can be. With reiteration in mind, we took all the best elements of Express and improved on them, creating a friendly, highly functional and streamlined design that's perfect for fast-growing business environments.

ELEVATED COMFORT

Evolving the best bits of the original Express task chair, Express 2 features a synchronised tilt-lock and refined auto-recline mechanism. This allows the chair to respond to the body's movement instantly by reclining at a generous range, between 7 and 20 degrees. This way, Express 2 supports every posture while activating circulation throughout the body, maximising health benefits in the workplace.

We have improved on comfort with a special sliding seat mechanism that gives more room to stretch the legs when reclining. Express 2 also features an enhanced backrest with fully breathable 3D mesh that conducts heat and disperses moisture more effectively than ever. Meanwhile, a contoured seat pad makes for even more comfort – and style.

REFINED DESIGN

With its clean lines, the original Express was always a versatile chair that worked in any space. We have taken that versatility and multiplied it, using a leaner silhouette and edgy angles to turn Express 2 into a seat that's built to last the distance, both in terms of look and functionality. The result is a task chair that's light, unpretentious and easy to use, no matter where you are.

Express 2's backrest comes in mesh or upholstered versions. In addition, choose from no arms, fixed arms, height-adjustable arms or 3D adjustable arms.

THE POWER OF CHOICE

We have also expanded the Express family: with Express 2, there's more choice than ever, thanks to new finishes that give plenty of room to self-expression. Now, choose from a range of base options, including chrome, nylon, glides,

castors, or a cantilevered base. And we have improved on the original cantilevered design, now offering Express 2 in a black-framed version and a fresh, white-framed finish.

ACTIVE CERTIFICATION

Performance

ANSI/BIFMA x5.1-2017
AFRDI™ Level 6 AS/NZS 4438:1997 (R2016)

MAKE IT PERSONAL

Customise Express 2 by choosing from a wide variety of textiles. New material options make Express 2 even more personal; Medley and Zen are two of the most exciting fabric choices on offer with this task chair. Ideal for high-quality environments, these fabrics hit just the right price point.
